Subscriber	Employer	Insurance	Annual Renewal	Unmet Deduct	Remain Benefit
Jonathon	Bentley Automotive	HRM Claims Managem	01/01	.00	853.00

Due to constantly changing insurance regulations, benefits, and deductibles, we are only able to approximate your insurance balance. If your insurance pays more than expected, you will be credited the difference. If your insurance company pays less than expected, you will be charged the difference. Final responsibility for payment rests with the person responsible for your account.

CROWNS; commonly called "Caps", are artificial covers for decayed or damaged teeth; They are made of plastic, metal, or porcelain ... or a combination of plastic, metal, or porcelain. Crowns not only restore teeth back to their original shape and beauty...but more importantly they protect the teeth from further breakdown and damage due to heavy chewing pressures. They are often used to protect teeth that have grown brittle and weak due to very large fillings or root canal therapy.

COMMENTS :

Payment is due at time of service. If you need to make financial arrangements, please discuss them with our financial coordinator prior to starting treatment.
